

Automatic Flowbit Resolution

Resolve Flowbits

☒ If checked, Snort will auto-enable rules required for checked flowbits. Default is Checked.
Snort will examine the enabled rules in your chosen rule categories for checked flowbits. Any rules that set these dependent flowbits will be automatically enabled and added to the list of files in the interface rules directory.

Auto-Flowbit Rules

 [View](#)
Disabling auto-flowbit rules is strongly discouraged for security reasons. Auto-enabled flowbit rules that generate unwanted alerts should have their GID:SID added to the Suppression List for the interface instead of being disabled.

Snort Subscriber IPS Policy Selection

Use IPS Policy

☐ If checked, Snort will use rules from one of three pre-defined IPS policies in the Snort Subscriber rules. Default is Not Checked.
Selecting this option disables manual selection of Snort Subscriber categories in the list below, although Emerging Threats categories may still be selected if enabled on the Global Settings tab. These will be added to the pre-defined Snort IPS policy rules from the Snort VRT.

Select the rulesets (Categories) Snort will load at startup

-  - Category is auto-enabled by SID Mgmt conf files
-  - Category is auto-disabled by SID Mgmt conf files
